

Thermostatic Temperature Regulators Series 1140 & 1141

The Series 1140 & 1141 Temperature Regulators are designed to maintain a desired temperature for commercial and institutional heating and cooling applications. They are self-actuated and vapor pressure operated.

- Operating modes
 - Direct Acting
 - Reverse Acting
 - Three Way
- Available in sizes 1/2" - 4" (15-100mm)
- Available in various body styles with different seating arrangements
- Hermetically sealed actuator available in temperature control ranges of 40°F (4.4°C) through 220°F (104°C) in increments of 40°F (22.2°C)
- Optional wells available in copper or stainless steel
- Heavy duty 10 ft. (3mm) capillary with flexible armor and reinforced ends
- Maximum body pressure
 - 1/2" -1 1/2" (15-40mm) NPT 250 psig (17.3 bar)
 - 2" (50mm) NPT 200 psig (13.8 bar)
 - 2 1/2" - 4" (65-100mm) Flanged 125 psig (8.6 bar)
- Maximum body temperature 406°F (208°C)

Series 1140 Regulators are cross ambient filled and may be used where ambient temperature exceeds the set control temperature. Series 1141 Regulators are *not* cross ambient filled and should not be used where ambient temperature exceeds the set control temperature.

How to Select

Standard Unit Orders

1. Determine body style based on type of service. See Selection Data Chart below.
2. For complete units provide the 6 digit part number and description in the following format.

1140 TMP REG – Body Code – Body Size – Temperature Range

For example, to order a 1 inch (25mm), 02 body, 140° to 180°F (60-82°C) degree range unit with standard bulb and capillary, your order should have the following:

Hoffman Specialty Part Number – 400117 Description – 1140 TMP REG 02 1.0 140 – 180

Select a range with the operating set point in the mid or upper portion of the range.

3. Units may also be ordered as Body Bracket Assemblies with separate Actuators. This offers a large variety of applications while maintaining low stock.

⚠ WARNING	
	<p>Series 1140 and 1141 Regulators fail open. An alarm or cut-off must be installed on applications where overheated water could cause harm. Failure to follow this warning could cause serious burns, personal injury, or death.</p>

Selection Data

Body Code	Service		Body Design	Recommended Application
	Water	Steam		
01	X	X	Two way Heating	Low pressure up to 50 psi (3.5 bar) Differential (Composition Disc)
02	X	X	Two way Heating	Low & High pressure up to 125 psi (8.6 bar) Differential (SS Seat and Disc)
02R	X		Two way Cooling	
03		X	Two way Heating	High pressure up to 250 psi (17.3 bar) Differential (SS Seat and Disc)
05	X	X	Two way Heating	High pressure up to 250 psi (17.3 bar) Differential (Double Seated SS)
05R	X		Two way Cooling	
06	X		Three way Mixing or Diverting	Sliding piston three way valve

How to Size Series 1140 & 1141 Regulators

For Steam

1. Use the selection chart to determine the body code required.
2. Determine the capacity required by using the formulas and tables.
3. Determine the available initial steam inlet pressure.
4. Determine the outlet pressure required, based on your heating or cooling equipment.
5. Use the capacity tables to select the regulator required.

Example:

What size regulator is required to heat 500 GPH (1892 LPH) of water from 60°F (15.5°C) to 160° (71.1°C) [100°F (55°C) temperature rise]? The regulator inlet pressure is 15 psig (1.0 bar) and the heat exchanger operating pressure is 9 psig (.6 bar).

Solution:

Use Table 2 or 2A to determine the required capacity of 420 lbs./hr. (190 kg/hr.). Use the single seat body code 01 or 02 capacity tables. You can use a 1 1/4" (32mm) valve rated for 572 lbs./hr. (260 kg/hr.)

For Water

1. Use the selection chart to determine the body code required.
2. Determine the capacity required by using the formulas and tables.
3. Determine size required:
 - For **body codes 01, 02, and 02R** use Cv/Kv in capacity tables.
 - For **body codes 05, 05R, 06** use capacity graphs.

To determine the Cv when you know the required flow rate (in GPM) and the differential pressure; use the formula.

Gravity can be ignored when the water temperature is under 200°F (93°C)

Example:

To handle a maximum flow of 20 GPM at 22 psi differential, the Cv required is:

$$CV = \frac{20}{\sqrt{22}} = 4.26$$

Solution:

You can use a 3/4" (20mm) body code 01 or 02 with an actuator for the required temperature.

Note: To convert GPM to LPM, multiply the GPM by 3.78.

Thermostatic Temperature Regulators (continued)

Series 1140 & 1141 (continued)

Formulas for Sizing

Heating liquids other than water (A) rate of flow—fluid to be heated (gal./hr.) (B) Weight of fluid (lbs./gal.) (see Table 1.) (C) Fluid temperature rise (degrees fahrenheit). (D) Specific heat of fluid being heated (see Table 1.)	$\text{(lbs. of steam/hr.)} = \frac{\text{(A)} \times \text{(B)} \times \text{(C)} \times \text{(D)}}{1,000}$ <p>To convert lbs. of steam/hr. to kg of steam/hr.; multiply lbs. of steam/hr. by .454.</p>
Cv determination	$\frac{\text{GPM} \sqrt{\text{specific gravity}}}{\sqrt{\text{pressure drop}}} = \text{Cv required}$

Table 1 – Weights and Specific Heats of Liquids at 60°F (16°C)

Liquid	Weight lbs./gal.	Specific Heat BTU/lb./ °F
Fuel Oil (No. 6)	7.909 to 8.448	0.4 to 0.5
Heat Transfer Oil (Light)	8.17	0.82
Mineral Oil	7.67	0.65
Olive Oil	7.67	0.47
Petroleum Oil	6.84	0.50
Water	8.337	1.00

405526	1140	SS	1 1/8 x 36 (29 x 914)	4 (1.8)

Series 1140 & 1141

Direct Acting

The Series 1140 and 1141 Direct Acting Regulators are designed for commercial and institutional heating systems and equipment applications such as hot water tanks, vats,

steam tables, sterilizing equipment, instantaneous heaters, apartment buildings, or others that require steam temperature control.

Body Code 01

- Steam or Water Service—
for Positive dead end service
- Single Seat, Composition Disc, Brass Trim—
Brass integral seat
- Body—Brass body, union ends
- Maximum Differential Pressure:
 $\frac{1}{2}$ " (15mm) — 50 psi (3.5 bar)
 $\frac{3}{4}$ " (20mm) — 50 psi (3.5 bar)
 1" (25mm) — 32 psi (2.2 bar)
 $1\frac{1}{4}$ " (32mm) — 20 psi (1.4 bar)
 $1\frac{1}{2}$ " (40mm) — 16 psi (1.1 bar)
 2" (50mm) — 8 psi (.55 bar)

Regulators

Series 1140 & 1141 (continued)

Body Code 02

- Steam or Water Service—
Used for dead end shut-off where higher temperatures and pressures prevail
- Stainless Steel Single Seat and Trim—
1/2" (15mm)—Removable stainless steel seat and cone disc
3/4" - 2" (20-50mm)—Integral stainless steel seat ring and bottom guided seat disc
- Body—Brass body, union ends
- Maximum Differential Pressure:
1/2" (15mm) - 125 psi (8.6 bar) 1 1/4" (32mm)- 20 psi (1.4 bar)
3/4" (20mm) - 60 psi (4.1 bar) 1 1/2" (40mm)- 16 psi (1.1 bar)
1" (25mm) - 32 psi (2.2 bar) 2" (50mm)- 8 psi (.55 bar)

Series 1140 & 1141 (continued)

Body Code 03

- Steam Service Only—
Used for dead end service up to maximum body steam pressure
- Stainless Steel Balanced Single Seat and Trim—
Removable stainless steel seat, disc, and balancing piston
- Body— $\frac{3}{4}$ " (20mm) through 2" (50mm)—brass body, union ends
- Maximum Differential Pressure:
 $\frac{3}{4}$ " (20mm) — 250 psi (17.3 bar)
 1" (25mm) — 200 psi (13.8 bar)
 1 $\frac{1}{4}$ " (32mm) — 200 psi (13.8 bar)
 1 $\frac{1}{2}$ " (40mm) — 200 psi (13.8 bar)
 2" (50mm) — 150 psi (10.3 bar)

Series 1140 & 1141 (continued)

Body Code 05

- Steam or Water Service –
For high steam pressure and/or high capacity applications.
- Stainless Steel Double Seat and Trim – Trim consists of seat rings and center guided plunger. Double seated valves have 1% allowable leakage rate.
- Body – 3/4" - 2" (20-50mm) – brass body, union ends
2 1/2" - 4" (65-100mm) – Iron body, flanged, faced and drilled for 125 lbs. (13.8 bar) standard
- Maximum Differential Pressure:
3/4" (20mm) – 250 psi (17.3 bar)
1" - 1 1/2" (25 - 40mm) – 200 psi (13.8 bar)
2" (50mm) – 150 psi (10.3 bar)
2 1/2" - 4" (65 - 100mm) – 125 psi (8.6 bar) (iron body, flanged)

Series 1140 & 1141 (continued)

Capacities — Water Flow vs Pressure Drop
Body Code 05 Direct Acting, Double Seated Valves

Thermostatic Temperature Regulators (continued) Series 1140 & 1141 (continued)

Reverse Acting

The Series 1140 and 1141 Reverse Acting Regulators are designed for commercial and institutional cooling

applications such as re-circulating lines, diesel engines, cooling towers, or others that require liquid temperature control.

Body Code 02R

- Steam or Water Service—
Used for general cooling service where dead end shut-off is required
- Stainless Steel Single Seat and Trim—
Trim consists of stainless steel seat ring and bottom guided disc
- Body—Brass body, union ends 3/4" - 2" (20-50mm)
- Maximum Differential Pressure:
1/2" (15mm) – 125 psi (8.6 bar)
3/4" (20mm) – 60 psi (4.1 bar)
1" (25mm) – 32 psi (2.2 bar)
1 1/4" (32mm) – 20 psi (1.4 bar)
1 1/2" (40mm) – 16 psi (1.1 bar)
2" (50mm) – 8 psi (.55 bar)

Body Code 05R Reverse Acting, Double Seated Valves

Regulators

Series 1140 & 1141 (continued)

Three Way

The Series 1140 and 1141 Three Way Regulators are designed for commercial and institutional applications

such as boilers, engines, or others that require mixing, tempering, or diverting liquids at a set temperature.

Body Code 06

- Water Service Only
- Nickel Plated Piston, Brass Trim—
Sliding piston
- Body— $\frac{1}{2}$ " - 2" (50mm)—brass body, union ends, bottom connection screwed
 $2\frac{1}{2}$ " - 4" (65-100mm)—iron body, flanged, faced and drilled for 125 lbs. (13.8 bar) standard
- Maximum Pressure 250 psig (17.3 bar)
- Maximum Differential Pressure:
 $\frac{1}{2}$ " - $\frac{3}{4}$ " (15 - 20mm) — 250 psi (17.3 bar)
1" - 2" (25 - 50mm) — 200 psi (13.8 bar)

Ordering Information

Series 1140 Regulators (Cross ambient filled)

NPT Size in. (mm)	Temperature Range								Weight (Approx.) lbs. (kg)
	40–80°F (4.4–27°C)	60–100°F (16–38°C)	80–120°F (27–49°C)	100–140°F (38–60°C)	120–160°F (49–71°C)	140–180°F (60–82°C)	160–200°F (71–93°C)	180–220°F (82–104°C)
